## SUMMARY OF QUALIFICATIONS

**Hardworking Medical Technologist** with five years of diverse experience in chemistry, hematology, coagulation, serology, infectious diseases, microbiology, and blood bank settings. Excellent clinical laboratory skills, conducting and analyzing assays, processing and storing specimens, and resolving complex clinical and instrumental problems accurately. Supportive team player who works well with all staff in fast-paced environments. *Areas of expertise include:*

Centrifugation | Serum Separation | Blood Smears | Quality Control (QC) | Policies / Procedures Compliance  
Reporting / Documentation | Equipment / Instrument Cleaning | Multitasking | Data Entry

## PROFESSIONAL EXPERIENCE

SHELBY COUNTY HEALTH DEPARTMENT | Seattle, WA

12/2017 – Present

### Medical Technologist

Use laboratory technology to diagnose and monitor infectious disease in individuals.

- Prepare accurate, detailed reports to provide essential information for effective public health interventions.
- Capable to differentiate between colors and move, carry, or lift lightweight materials up to 50 pounds.
- Streamlined redundant paperwork, resulting in reducing errors and time to prepare documents.

BAPTIST MEMORIAL HEALTHCARE CORPORATION | Seattle, WA

05/2015 – 11/2017

### Medical Technologist

Utilized laboratory skills to perform and report patients' results in core lab, microbiology, and blood bank settings.

- Received samples, verified patient identification, and prepared samples for testing.
- Ensured compliance with government, hospital, and laboratory policies and procedures for maintaining cleanliness of equipment, instruments, and work area.
- Documented and maintained QC, following established laboratory procedures.

LABORATORY CORPORATION OF AMERICA | Southaven, MS

05/2013 – 05/2015

### Accessioner

Processed 80–90 sample specimens per hour, maintaining accuracy of patient identification prior to accessioning orders.

- Checked specimens for contamination before preparing for testing.
- Performed various procedures, including centrifugation, serum separation, and blood smears.
- Completed data entry tasks for entering patient specimen information in LIS.
- Ensured proper storage of specimens in storage area.

## EDUCATION / CERTIFICATION

UNIVERSITY OF TENNESSEE HEALTH SCIENCE CENTER | Memphis, TN

**Master of Science in Clinical Laboratory Science, 12/2015**

UNIVERSITY OF TENNESSEE | Knoxville, TN

**Bachelor of Science in Biology, 05/2012**

**Medical Laboratory Scientist (MLS) Certification**, ASCP Board of Certification (BOC), valid through 08/2023
